

Ist Medienkompetenz und Informatik in den Schulen sinnvoll?

Beitrag von „Dejana“ vom 22. Mai 2015 18:59

Word, PPT und Excel sind bei uns nur ein ganz kleiner Teil des Informatiklehrplans. Sie sind mehrheitlich nur Mittel zum Zweck.

1. und 2. Klasse:

Pupils should be taught to:

- understand what algorithms are, how they are implemented as programs on digital devices, and that programs execute by following precise and unambiguous instructions
- create and debug simple programs
- use logical reasoning to predict the behaviour of simple programs
- use technology purposefully to create, organise, store, manipulate and retrieve digital content
- recognise common uses of information technology beyond school
- use technology safely and respectfully, keeping personal information private; identify where to go for help and support when they have concerns about content or contact on the internet or other online technologies

3.-6. Klasse:

Pupils should be taught to:

- design, write and debug programs that accomplish specific goals, including controlling or simulating physical systems; solve problems by decomposing them into smaller parts
- use sequence, selection, and repetition in programs; work with variables and various forms of input and output
- use logical reasoning to explain how some simple algorithms work and to detect and correct errors in algorithms and programs
- understand computer networks, including the internet; how they can provide multiple services, such as the World Wide Web, and the opportunities they offer for communication and collaboration
- use search technologies effectively, appreciate how results are selected and ranked, and be discerning in evaluating digital content
- select, use and combine a variety of software (including internet services) on a range of digital devices to design and create a range of programs, systems and content that accomplish given goals, including collecting, analysing, evaluating and presenting data and information
- use technology safely, respectfully and responsibly; recognise acceptable/unacceptable behaviour; identify a range of ways to report concerns about content and contact

Vor allem mit dem Programmieren haengen wir ein bissl hinterher. Kodu will auf unseren Laptops einfach nicht laufen, weshalb ich momentan auf Alternativen zurueck greifen muss. Wir

haben aber z.B. auch nen Robotikclub fuer die 3.-6. Klasse.
